

The Automated ScoreBook For Golf - What's New 2005-2011 – Page 1

What's New For 2011:

Version 1.11.0 (same version as last year—no upgrade from v1.11) Available June 2011

- Access to all updates through May 2012
- Add Reconcile button to Tournament roster to allow for "normalize" of player names after import
- In box score, show "dq", "dnc", etc. as appropriate instead of "-"
- Conference Html: Generate game file html names in lower case on local computer
- Add name format conversion buttons to team roster window
- In live Html, show starting tee time where applicable (instead of "-" or "DNF")
- Display medalist (top 1) instead of Top 20 in top finishes section of Season Stats
- Display medalist (top 1) instead of Top 20 in top finishes section of Career Stats
- Improve sort for team standings in Live HTML
- Save additional team info for roster import/export (click OK on player roster window)
- In Career reports, fix to remove erroneous "Top20" column header from Career Stats Summary report

2008 (Version 1.10)

- Access to all updates from June 2008 through May 2009
- Add golf tab to tascii backup/restore window
- Optionally include player scorecards in HTML pages
- Add relation to par breakdown on scorecards summary page
- Capability to insert graphic images into the header area of hardcopy "style" reports
- Match entry: allow for entry of "10" or higher when using numeric keypad (in addition to number keys on main keyboard)
- Live HTML: adjust par calculations to accommodate hole-by-hole scores collection during a tournament
- Live HTML: optionally create a link to a scorecard display for each player from the Leaderboard page -- enable the "Include scorecards page" option on the Live update screen
- Pairings reports: add a "Stringer sheets" report to print score collection sheets for stringers out on the course during a tournament
- Pairings reports: under Reports | Pairings | Group information allow for tee designations such as "1A" and "1B" to accommodate the sequence for shotgun starts
- Match entry: adjust colors for below par (red), par (green) and above par (black) on scorecard entry screen
- Live HTML: include match notes at top of the live tournament update page

2007 (Version 1.9)

- Access to all updates from June 2007 through May 2008 (i.e., versions 1.9.1 - 1.9.xx)
- New style reports: AP box, leaderboard, individual results, team results, team by team, conference leaders, season statistics, career summary

2006 (Version 1.8)

- Access to all updates from June 2006 through May 2007 (i.e., versions 1.8.1 - 1.8.xx)
- Implement tournament "Scorecards" report
- Implement tournament "Hole-by-hole summary" report
- Implement "Conference" page functions (leader reports and HTML pages)
- Add "slope" and "rating" fields to course information entry
- Add links to team scores section in leaderboard HTML
- Add team/individual low rounds section to season statistics report
- Add team/individual low rounds section to conference statistics report

The Automated ScoreBook For Golf - What's New 2005-2011 – Page 2

- Option to include team roster page in HTML output
- Implement "Include selected matches" (to separate spring/fall stats, for example)
- Implement change player name/team id function thru all matches
- Add function to generate player pairings HTML page
- Add automatic refresh (60 seconds) for live HTML update
- Various fixes and other minor enhancements
