

The Automated ScoreBook For Ice Hockey- What's New 2000-2011 – Page 1

What's New For 2011:

Version 3.13.0 (available July 2011)

- Access to all updates from June 2011 through May 2012 (i.e., versions 3.13.1 - 3.13.xx)
- Live XML activation through July 2012

Version 3.12.1 - 3.12.07 (updates made from June 2010 - May 2011)

- Add Support for entry of career-totals-only statistics (career totals for a player, without season-by-season stats for that era). To use this:
 1. Select Edit | Add new season
 2. Add a season for the last year of the player(s)
 3. Select Edit | Edit season data
 4. Check the "Contains career totals only" option
 5. Click the "Individual stats" button
 6. In the "Full roster" list click <New player>
 7. Enter the career totals for a player who last played in that year
 8. Repeat for other players as necessary
 9. Stats entered will be marked as "Contains career totals only", will be considered for individual career records, not individual season records.
- Fix to tab-stop output for career individual single-game highs
- Add option to force page break for each player -- Individual game-by-game (hardcopy 'style' mode)
- Fix to Team statistics report to show goals by period for OTs where no goals were scored
- Improve NCAA team code lookup function for Xml output.

What's New 2000-2010

2010 (Version 3.12.0)

- Access to all updates from June 2010 through May 2011 (i.e., versions 3.12.1 - 3.12.xx)
- Live XML activation through July 2011
- New Career Single Game High's Report
- Career Single Game High's included in Career Summaries for individual players, both hardcopy and HTML format
- Career All-time Results and All-time vs. Opponents included in the HTML
- In Career reports, show season summary Html in browser
- Add national rankings in Career results

- Add Career reports XML summaries (by season) for archive purposes
- Add controls for Career HTML column header color
- Accommodate career historical data where games played information was not tracked
- Add "All" line to Individual Career Summary for "prior team" stats totals
- Add controls for Conference HTML column header color
- Html output: Add handling for "special" characters in player names
- Various fixes and minor enhancements

2008 (Version 3.10)

- Access to all updates from June 2008 through May 2009
- Live XML activation through July 2009
- New style format season reports
- New style format career/historical reports
- Table-style format career HTML output
- Improve directory prompts for: import/export, pack/unpack, copy HTML to disk, backup/restore
- Capability to insert graphic images into the header area of hardcopy "style" reports
- Roster report added to "Season Reports" (features include sort by uni # or name, 'style' format and XML format)
- HTML generate: accommodate Vista to display HTML | View HTML functions
- Utilities: modify method for import roster to accommodate Vista (fix to avoid failure in copy of ".hro" file)
- Game reports: include players who DNP in Team Summary section of Media box score 'style' report
- Game reports: include a team totals line in the faceoff section of the box score (media summary)
- Game scoring: display uniform number in 3-stars selection list to simplify player selection (game wrapup)
- Game scoring: implement expanded penalty code list (\$PEN)
- Manual entry: display uniform number in 3-stars selection list to simplify player selection (game wrapup)
- Game reports: implement 'style' format for newspaper box and shot chart reports (for Display | All selected report packet)
- Season reports: display goalie statistics on a separate page from skater stats on the Individual Game-by-Game report
- Manual entry: automatically sort the Goal history list in chronological order after edit
- Live HTML: optionally display game info within sponsor text -- (add a line in the sponsor text file with the tag: <info/>)
- Various fixes and other minor enhancements

2007 (Version 3.9)

The Automated ScoreBook For Ice Hockey- What's New 2000-2011 – Page 3

- Access to all updates from June 2007 through May 2008
- Live XML activation through July 2008
- New style game reports: boxscore, game summary, play by play
- Game Viewer - allow for "http" access to game, season, and career XML files via the internet
- Use player uniform number in season HTML files/links for individual game-by-game outputs to allow for more predictable file names (for example, to create links from player bio pages)
- Calculate goals-against-average based on rules settings to allow for different number of periods/minutes
- Option to mark stats for a player from another team/school (to exclude from season & career leaders)
- Install updated NCAA team code list (ncaacode.rpi)
- Game Viewer - implement method to automatically resize viewer window at startup
- Various fixes and other minor enhancements

2006 (Version 3.8)

- Access to all updates from June 2006 through May 2007
- Live XML activation through July 2007
- New stylesheet format for live HTML stats with TAS Live
- Career summary all-time, single-season rankings
- Career all-time records vs opponents
- Roster name format functions (upper,mixed,first,last)
- Import games list sort by date
- Table-style format for post-game web pages
- Scoring for concurrent major and game misconduct/DQ
- Prompt for originating penalty on penalty shot
- Referee signature in box score
- Career category ordinal rankings (1., 2., etc.)
- Career categories for GWG and save pct
- Prompt team name spelling on roster import
- Conference career category for save pct

2005 (Version 3.7)

- Access to all updates from June 2005 through May 2006
- Live XML activation through July 2006
- Career reports: game results are now included in the Season | Summary report and Summary HTML outputs
- Career reports: new "All-time results" report shows game results for each season
- Career reports: new "All-time vs team" report shows game results against a selected opponent
- Career reports: career capture automatically extracts game results; edit function to enter results for prior seasons
- Easier setup for transmit of report files to Sports Systems
- Add penalty shot info to the box score reports and game XML output
- Improve listing of officials titles in venues with 2 referees and 1 assistant referee (such as DIII and HS)
- Add "did not play" info to the media box score, box score summary, and XML output reports
- Remove warning when entering a play for for a uniform number currently in the penalty box (to avoid inconvenience requiring scorer to clear a warning message that can occur in the case after a goal is scored when a different player is returned to the ice by the officials than is expected by the software
- In-game scoring: after a goal is scored on a power play, and the shorthanded team is more than one player down, prompt for which player returns from the penalty box (instead of automatically returning the first player)
- In-game and manual entry: Increase maximum penalty list size from 50 to 70 penalties
- Post shutout to goalkeeper instead of Team if the only goalie were empty net situations
- Include latest version of NCAA team code list (to support Edit RPI codes function)

The Automated ScoreBook For Ice Hockey- What's New 2000-2011 – Page 4

2004 (Version 3.6)

- All maintenance updates from June 2004 through May 2005
- Live XML activation through July 2005
- New conduct reports
- New Control Panel feature to access software downloads online
- Prompt for uni # of shot block (defense) in-game
