

What's New For 2011:

Version 1.11.0 (same version as last year—no upgrade from 1.11) Available June 2011

- Access to all updates through May 2012
- Add individual conference W-L record to Season editor and to applicable career reports
- "Normalize" player name spellings during import process
- Populate master roster for new team during import of dual match
- Update NCAA team codes
- Improve sort order for sort by flight wins option
- Add name format conversion buttons to Edit Team Roster window
- For squash mode, remove empty Doubles section from Season Statistics report
- Add page break if needed in Season Statistics report for a larger volume of singles/doubles/results
- Add doubles section to Season Stats report (in addition to current doubles teams section)
- Exclude "No Player" from season stats and match-by-match reports
- Add option to sort stats by "Flight" wins
- Display ties if present in W-L-T summary at top of season stats
- Add hardcopy and HTML output for selected single-season archive in Career reports
- In Tournament Html, add space after non-breaking space in box score to accommodate web server tools

2008 Version (1.10)

- Access to all updates from June 2008 through May 2009
- Add tennis tab to taszip backup/restore window
- Capability to insert graphic images into the header area of hardcopy "style" reports
- Match entry: do not display "duplicate" warning message when more than one flight contains an entry of "No player"

2007 (Version 1.9)

- Access to all updates from June 2007 through May 2008
- New style reports: season results, individual match by match, team match by match, season statistics, career summary
- Dual match entry: Add "Suspended match" indicator for a suspended dual match -- individual results will count toward season statistics but this match does not count toward team won-lost record
- Change box score to display only national rankings on the team and individual results lines; regional rankings are still calculated and displayed in various season statistics reports
- Add page breaks to the Career Summary report
- Show tiebreaker info in Individual match-by-match in season HTML output
- Include "venue" information in match/tournament box scores and live HTML update page

2006 (Version 1.8)

- Access to all updates from June 2006 through May 2007
- Automatically generate flight/section headings for a tournament
- Improve page breaking for individual match-by-match
- Add "Tour" column to season statistics report
- Option to include conference-only page in HTML output
- Option to include team roster page in HTML output
- Implement tab stops option
- Implement support for squash venue
- Cosmetic improvements to tournament entry window

The Automated ScoreBook For Tennis/Squash - What's New 2003-2011 – Page 2

- Add automatic refresh (60 seconds) for live HTML update
- Various fixes and other minor enhancements

2005 (Version 1.7)

- Access to all updates from June 2005 through May 2006
- Results entry: disable the "Force visitor as home" option on the General info page (this option is not currently used)
- Results entry: add option on General info page for "Doubles = 2 points" to support scoring methods where a dual match is 5 singles flights plus one doubles match that counts as 2 points (for a total of 7 points)
- Implement the "Forfeits" section of the Dual match info screen
- Automatically include a "No player" entry to each team roster when entering a dual match for use in default match
- Add method to insert sub-headings (for example, "#1 Singles Finals") into the Tournament box score report
- Prompt for overwrite of existing match files when creating new match
- Match entry: add new entry screens for tournament results --
- Select Match results | New tournament to score a tournament
- Use Tournament roster screen to identify teams and players
- Enter Singles results and Doubles results
- Select Reports | Tournament box score
- Include tournament "matches" in schedule/results report
- Remove the "MP" column from the Season statistics hardcopy report
- Add tournament W-L entry and reporting to career stats functions
- Add reports for career records and singles season records
- Improve layout of Career reports screen
- Implement specific button function to enable view of HTML settings (otherwise remain hidden)
- Add "Copy HTML to disk" function
- Add links to players at top of Individual match-by-match HTML report
- Add links to section of the career statistics HTML pages
- Prompt for overwrite of existing match files in import match function
- Tournament entry function for conference statistics

2004 (Version 1.6)

- All maintenance updates from June 2004 through May 2005
- New Control Panel feature to access software downloads online
- Add windows for entry of singles/doubles details including: order of finish; individual records for pre-match report, national and regional rankings for individual players, tie-breaker score details, position (for tournament), opposing team (for tournament)
- Add fields for entry of team & opponent national rankings on Match entry | Match identification page
- Add Pre-Match report to list singles and doubles match-ups, team and player rankings, W-L records, match notes, etc.
- Show team/individual rankings in box score
- Show order of finish in box score
- Implement new individual match-by-match format (Detailed format) to show comprehensive player and opponent information for each singles/doubles match
- Add new options for season reports: 'detailed' individual match-by-match format; show team/individual rankings information and W-L records vs ranked opponents; miscellaneous individual statistics (current W-L streak, W-L over last 10 matches)
- Add filter for 'Selected' matches to improve ability to tailor contents of season reports
- Add 'Dual' column to season statistics to show W-L record of dual matches only
- Add Live match updates function (works with TasFtp similar to other products)
- Add utilities functions for export roster and import roster
- Add conference office functions

2003 (Version 1.5)

- Manual match entry
- Match box score report
- Season statistics report
- Schedule/results report
- Team-match-by-match report
- Individual match-by-match report
- Career statistics report
- HTML output for all reports
- Supports separate mens/womens databases
- Pre-set lineups, drag-and-drop match setup
- Roster maintenance, backup/restore, import/export
